ZERO-G

A unique opportunity to fly like a superhero and float like an astronaut. By boarding our specially-modified Boeing 727 aircraft—G-FORCE ONE®—you will experience what was previously only available to astronauts.

PARABOLIC FLIGHT

The plane flies between 24,000 and 32,000 feet in a trajectory that resembles a series of gently rolling hills. Once we reach altitude, you and your guests will leave your seats and enter the floating area—a large, open expanse of the cabin. As the plane begins to ascend, you will effortlessly lift off the floor and become weightless. This is not a simulation—you will experience exactly what astronauts feel in space!

QUOTE

“ A zero-gravity flight is the first step towards space travel... It was amazing. I could have gone on and on. Space, here I come!

STEPHEN HAWKING,
ASTROPHYSICIST

WHAT'S INCLUDED?

- + ZERO-G flight with 15 parabolas, each with 25-30-second periods of reduced gravity and weightlessness (totaling about 7 minutes of reduced gravity for the whole flight)
- + Official ZERO-G flight suit
- + ZERO-G gift bag
- + Pre-flight orientation and training
- + Flight-friendly refreshments
- + Video and photographs from your flight

IS IT SAFE?

Yes, and your safety is our highest priority. The aircraft is not being asked to do anything that it wasn't designed to handle. Our flights abide by the same standards required of other commercial providers, and we are certified under the highest safety standards of the FAA. NASA has even selected ZERO-G as its partner and provider of parabolic flights.

WHAT TO EXPECT

We fly 15 parabolas, gradually building up from one Martian to two Lunar parabolas, and then zero gravity. Weightlessness occurs at the top curve of each arc, for about 25-30 seconds each time. In total, your Weightless Experience will provide you with about 7 exhilarating minutes of weightlessness.

QUOTE

ZERO-G is a great product for incentives, celebrations or education. I've flown twice and loved it every time.

**DR. CRAIG BARRETT, FORMER
CHAIRMAN, INTEL**

FLIGHT SCHEDULE

Check in
Enjoy some refreshments and become acquainted with each other.

Pre-flight briefing
Get your flight suit, view our required orientation and safety video, then meet your coaches.

Security screening and boarding G-FORCE-ONE®.

The plane takes off. Fly to altitude After 30-45 minutes of flying to our designated airspace participants enter the floating area and prepare for fun.

The weightless experience
Up to fifteen 30-second periods of reduced gravity and weightlessness.

Re-gravitation Return to your seats and share in the afterglow.

IS IT FUN?

ZERO-G is the very definition of fun. Your entire perspective is changed. You're free to move without the constraints of gravity, and Newton's Laws of Physics come to life. Your dreams of flying can finally come true!

QUOTE

"It was exhilarating! It was great to experience both lunar gravity and weightlessness again!"

BUZZ ALDRIN, APOLLO 11 ASTRONAUT
